Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/529,715	Applicant(s) LARSON ET AL.	
	Examiner HUYEN D. LE	Art Unit 2614	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-24, drawn to a method and apparatus of a mirror assembly comprising an accessory, a reflective element having a mounting plate, and a bezel at least partially receiving the reflective element, wherein the mounting plate including a first portion of a pocket and the bezel including a second portion of the pocket.

Group II, claim(s) 25-35 and claims 67-74, drawn to a microphone system comprising a mirror assembly or a windshield accessory module, a microphone, an acoustic cover comprising an outer air flow limiting layer and an inner air flow limiting layer, and an acoustic barrier.

Group III, claim(s) 36-53, drawn to an interior rearview mirror system comprising an interior review mirror assembly, at least one microphone, and an acoustic cover comprising a diffuser material and an air flow limiting material, where the diffusing material is configured to substantially diffuse air flow that penetrates the air flow limiting material.

Group IV, claim(s) 54-66, drawn to an interior review mirror system comprising a microphone system which comprises a directional microphone, a diffuser and an acoustic barrier positioned between the inlet ports of the directional microphone, wherein the diffuser is

Art Unit: 2614

positioned at both sides of the acoustic barrier and over the respective inlet ports to diffuse air flow at both sides of the acoustic barrier.

2. The inventions listed as Groups I, II, III and IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I drawn to a method and apparatus of a mirror assembly comprising an accessory, a reflective element having a mounting plate, and a bezel at least partially receiving the reflective element, wherein the mounting plate including a first portion of a pocket and the bezel including a second portion of the pocket; Group II drawn to a microphone system comprising a mirror assembly or a windshield accessory module, a microphone, an acoustic cover comprising an outer air flow limiting layer and an inner air flow limiting layer, and an acoustic barrier; Group III drawn to an interior rearview mirror system comprising an interior review mirror assembly, a microphone, and an acoustic cover comprising a diffuser material and an air flow limiting material, where the diffusing material is configured to substantially diffuse air flow that penetrates the air flow limiting material; and Group IV drawn to an interior review mirror system comprising a microphone system which comprises a directional microphone, a diffuser and an acoustic barrier positioned between the inlet ports of the directional microphone.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

Art Unit: 2614

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
